SUMMARY

A full-stack developer with a passion for building complex and beautiful web applications using modern programming languages and frameworks. Recently graduated with full scholarship from one of the world's top 5 coding bootcamps based in New York and currently working as an apprentice at Istanbul based software development firm. I am bilingual in Turkish and English with excellent command in interpersonal communication, project management, and teamwork.

SKILLS

Front End: HTML, CSS, JavaScript, jQuery, ReactJS, Bootstrap, Material UI

Back End: Node.js, Express, MySQL, NoSQL, MongoDB, Mongoose

Others: Figma, Adobe Photoshop, Git & GitHub

Languages: English (Native); Turkish (Native); German (Beginner)

TECHNICAL PROJECTS

Bank Mobile App Design Concept – [Figma](#) | [Presentation](#)

- Designed a new modern UI concept for Banque Saudi Fransi mobile app using Figma.
- Implemented a streamlined UX design for Login and Dashboard pages. Introduced a new “Rocket button” feature on the Login page that helps users make instant withdrawals, deposits, and transfers using QR codes.

Ecommerce Store – [GitHub](#) | [Demo](#)

- Functional replica of Vatan online store where a user can view products fetched directly from the local database, scroll a list of products in a carousel, and add products to the basket.
- Built responsively for 13 to 15-inch screens with HTML, CSS, Bootstrap, and vanilla JavaScript.

MovieLab – [GitHub](#) | [Demo](#)

- Showcases top watched movies and actors in real-time with search and dynamic filters functionalities.
- Styled a responsive website using CSS and Bootstrap.
- Used the Fetch API method in AJAX to retrieve data from the Movie DB API.

To-do List – [GitHub](#) | [Demo](#)

- Allows a user to create daily tasks by adding and deleting items, and make new lists using parameters in the address bar.
- Implemented CRUD function using JavaScript, Node.js, and Mongoose (MongoDB).
- Created templates using EJS for consistent styling for all lists created by users.
